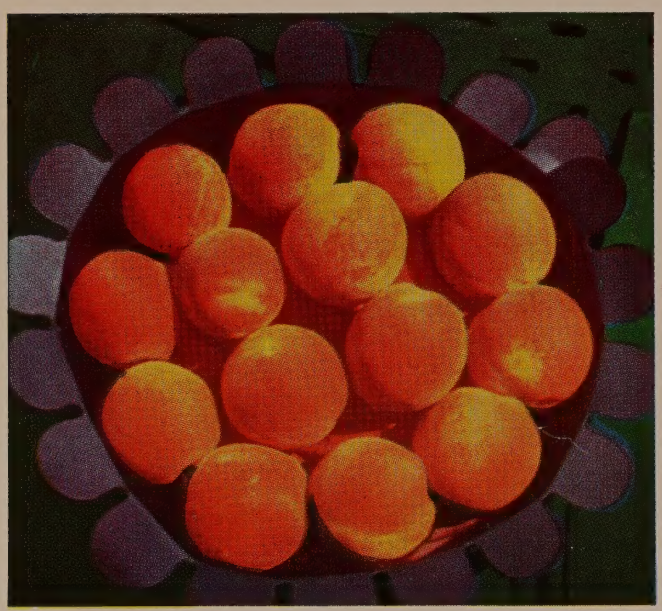
Serving the Orchard Trade for More than Forty Years

Below are shown two of the newer, outstanding commercial peach varieties

REDSKIN

(Requires 750 freezing hours for bloom buds.) Redskin is a new introduction of the Maryland Experiment Station, and is a cross between Hale and Elberta. It ripens slightly ahead or with Elberta. Tree is vigorous, fast growing and productive. Wood is hard and the buds survived a low winter temperature in 1942-43, along with the hardiest varieties, indicating that it is very bud hardy. Fruit is round, yellow flesh, with little or no color near pit. It is a complete freestone, firm flesh of excellent shipping quality, well colored with a deep red blush covering the fruit even when ripening under shade conditions. In taste, it is aromatic, vinous and sweet. Due to the firmness, it is rated high for canning. Fruit a good size even with heavy load on trees.



LATE SUNHAVEN

The late Sunhaven peach is medium-large, nearly round and uniform in shape. Skin color is much like Redhaven, largely bright red with enough bright golden ground color for attractive contrast. Pubescence, or fuzz, is so short and soft it is almost unnoticeable. The fruit keeps and handles unusually well for such an early maturing variety. Flesh is clear yellow, fine-textured, firm, of good flavor and very resistant to browning. Freestone when fully ripe, but otherwise a partial cling. This early maturing variety with bright color and excellent flavor make it highly desirable for fresh fruit market. The season of maturity is about with Redhaven and 30 days before Elberta. Trees are very large, vigorous and productive.

MORE THAN FORTY YEARS OF CONTINUOUS SERVICE TO OUR CUSTOMERS

Serving the Fruit Growers and Home Owners with Quality Nursery Stock has long been a tradition with us. We have specialized in growing highest quality fruit stock for the Commercial Orchardists for more than forty years.

We advise our Orchard trade to produce their fruit on young trees to keep production costs to minimum. This also enables them to keep abreast of the time with the newer and better varieties.

Variety and Tree selection can mean quicker results and more profit, as well as consumer satisfaction.

APPLES

The King of Fruits

EARLY SUMMER APPLES

Anoka. Bears on very young trees. Fruit large, faintly striped red; of delicious, tart flavor. Fine for cooking a month before ready for eating.

Lodi. Improved Transparent, the favorite early summer apple. Skin clear yellow; flesh white; flavor slightly acid.

Red June. An early summer Apple, producing medium-sized red fruit of distinctive flavor. Very productive and a splendid eating Apple; also fine for cooking.

Early Harvest. Medium to large, pale yellow, beautiful; fine flavor. Tree moderate, erect grower, good bearer.

FALL AND WINTER APPLES

Red Jonathan. One of the best in quality. Rich flavor; brilliant red skin. Excellent for both commercial and home use.

Grimes Golden. One of the best yellow Apples. Fine grained and juicy, with very pleasing, spicy flavor. Widely planted to pollinate self sterile varieties.

Yellow Delicious. Fine, firm-textured flesh, with golden yellow skin and pleasant flavor. An excellent variety for winter storage.

Dark Red Delicious. The most popular Apple of all time. Brilliant dark red color. Tree is one of the hardiest. A "must" in every orchard.

Virginia Red Winesap. One of the foremost Apples for both commercial and home use, and a universal favorite. An early bearer and very productive. Beautiful dark red skin; yellow flesh, firm, tender and juicy.

Dark Red Stayman Winesap. Carries at least double the color of the original strain of Stayman Winesap, otherwise exactly the same growth, hardiness, etc. We have discontinued propagating in our nurseries, also growing in our orchards, the regular variety of Stayman's Winesap, in view of the fact that we get the same quality in Double Red Stayman with double the color which sells the fruit for more money.

Red Rome Beauty. An improved Rome Beauty, identical in vigor and production. One of our most beautiful Apples and a favorite wherever grown. Bears large crops of delicious fruit.

Dolgo. A comparatively new and very unusual Crab Apple. It has been called the "Perfect Crab." The fruit is strikingly beautiful, bright fiery red, borne in great profusion. It jells perfectly—even when dead ripe. Dolgo is free from blight and is rapidly displacing the old varieties such as Transcendent and Hyslop. Dolgo makes a beautiful lawn tree and may be used on the home grounds instead of Mountain Ash.

PEACH TREES

Plant Cumberland Valley Dependable Trees

A PEACH FOR EVERY SECTION

Quality Peach trees is not a mere matter of the size of the trees at the time of purchase It includes the horticultural skill, knowledge, care and personal integrity actually em ployed from the securing of the Peach seed to the delivery of the stock.

Peaches are one of America's best-paying crops. While the trees prefer a well-drained, sandy loam, they will adapt themselves to almost any well-drained location if given proper care. Varieties are listed in about the order in which they ripen. See schedule for ripening, freezing hours, and other data.

Floridawon. This late introduction by University of Florida requires only about 250 chilling hours to break the dormancy, and blooms in late January. This precludes regular cropping in areas in which frost commonly occurs in February and March. It is recommended for areas similar in temperature to that of Central Florida. First fruits ripen in late April. Fruit shape is good, and has good ground color, with light surface blush. Flesh is yellow, and non-browning, and is freestone. Dessert quality of this peach is very good, and it is very desirable for fresh market.

Marcus. A very early yellow fleshed clingstone peach, ripening week before Mayflower, or about ten days before Cardinal. Fruits are round and pointed on tip, and average 2 to 2¼ inch in diameter. About 60 to 70 percent of the surface of the fruit is covered with red color and has a yellow ground color when fully ripe. The fruits are relatively firm for an early peach, with no noticeable softening of the suture.

Mayflower. The earliest Peach, but blooms late and is seldom damaged by frost. Size medium, round; bright red all over; ripens well to the seed. Tender, juicy, excellent flavor. Tree very prolific. Clingstone.

Hiland. A highly colored yellow-clingstone peach, being a cross between Southland and Hiley-Halehaven. Ripens just before Cardinal, or about five days before Dixired.

Cardinal. Fruit well covered with attractive red blush over good yellow ground color. Flesh is yellow, firm, medium textured and good flavor. About size of Dixired, with similar appearance and firmness, and ripens about four days ahead of same.

Maygold. Fruit is clingstone, of medium size, and attractively colored with red blush over yellow ground color. Flesh is yellow, firm but melting, medium-textured, and of good flavor. The outstanding characteristic of Maygold is the relatively short chilling requirement to break the rest period of its buds. Highly recommended for southern planting.

Dixired. Clingstone. Superior new variety of medium size, round with attractive blush. Yellow flesh, of medium texture and good flavor. Fruit acquires color long before ready to pick.

Redcap. A Southland-Dixired cross, ripening just ahead of Dixired and resembling this peach very much. A clingstone, medium size, round. Flesh is yellow, firm, but melting; medium textured and good flavor.

Early Sunhaven. (The original Sunhaven introduced by Stanley Johnson.) Matures ten days earlier than Redhaven. Fruit is large in size, nearly round, and uniform in shape. Color is much like Redhaven, largely bright red with stone ground color for attractive contrast. Fruits keep and handle unusually well for such an early maturing variety. Flesh is clear yellow, fine texture, firm, of good flavor, and resistant to browning. A partial cling until fully ripe. Trees are large, vigorous, and productive. Recommended for an early fresh market variety.

Coronet. A highly colored yellow peach, with good yellow ground color. Flesh yellow, firm but melting, smooth-textured; good mild flavor and a freestone when ripe. Trees are vigorous and productive.

Jerseyland. An early, large, firm attractive yellow-fleshed freestone. Hangs on well to the tree and is an excellent shipper. Tree is hardy, sets fruit buds freely and comes into bearing early.

Late Sunhaven. A Bud Sport, or Mutation of the original Sunhaven, and has all the good quality of the early variety. (See description above.) Late strain ripens about ten days later than early strain, or about with Redhaven, which is about thirty days before Elberta.

Redhaven. Among the best for its season. Beautiful color, firmness, high quality, and good consumer demand add popularity for this peach. Colors a bright red and beautiful yellow. Skin is smooth, almost fuzzless. Flesh is very firm. Tree vigorous with heavy bud set and bears young. Most desirable for fresh market.

Golden Jubilee. The tree is unusually hardy. The buds resist low winter temperatures better than Elberta and open later than Elberta which insures a regular crop. The blossoms are self-fertile. The peace is medium to large in size.

Ranger. A fine looking yellow freestone peach, ripening with or just after Golden Jubilee. Medium to large size, almost round, with light pubescence, highly colored with bright red blush covering almost all the peach. Flesh yellow, medium firm, medium textured, good flavor and suitable for canning or freezing. Tree is vigorous and productive, showing marked resistance to bacterial leaf spot. Blossoms medium sized, self fertile, usually after Elberta. Ranger has been proven one of the best varieties for freezing and canning.

Keystone. Yellow-fleshed free-stone, ripening three weeks earlier than Elberta. It is large, has good quality, and appears to be firm enough for shipping. The peach is the result of a cross between Newday and Southland. It ripens a week earlier than Southland, and is fully as attractive in appearance. Also, it has greater resistance to bacteriosis than has Southland.

July Elberta (Burnett Elberta). A large, medium early freestone peach ripening with or slightly before Halehaven. Fruit is golden yellow, overspread with red. Quality is excellent for canning and fresh eating. Better than average for freezing.

Triogem. An early, oval, red all over, firm, yellow freestone peach. Trees are medium in size, hardy and heavy bearers. Requires good soil and good culture for best results.

Washington. An excellent new Yellow Fleshed peach, with outstanding frost escaping ability, developed by Virginia Agri. Experiment Station, and already well adapted to mountain areas of Virginia. Fruit has outstanding qualities of size, color, firmness of flesh, texture and flavor, and is fully freestone. Washington ripens about 21 days before Elberta, or about 3 days after Triogem, and 3 days before Sunhigh. It is an effective pollenizer for varieties that have poor pollen. Please note that Washington will not be available until Fall, 1961.

Southland. Splendid new yellow-fleshed variety, ripening about sixteen days before Elberta. Freestone with little fuzz and extra flavor. One of the best for both home and commercial use. Fruit is medium to large size, round and has attractive light-red blush. Flesh is firm, slow softening, and medium textured.
good tough skin, with beautiful red coloring. One of the finest peaches for "quick freezing."

Sunhigh. A large, red, bright, smooth peach, which colors well all over before it ripens. Softens slowly, making it an excellent shipper. Flesh inclines to adhere to the pit when hard ripe, but is generally freestone. Tree is spreading ingrowth, and buds are hardy. This variety seems to do best in hilly sections, and requires thorough summer spraying. Quality is such that it has topped the market for the past two seasons.

Richhaven. This outstanding new variety is recommended for all areas. Fruits are large, uniform in size and shape. Color is a bright red blush with stripes of red and gold laid over a bright golden ground color. Fuzz is unnoticeable and an unusually thick, tough skin adds to its handling and shipping ability. Flesh is a clear yellow with moderate redding around the pit. Entirely a freestone when ripe. Ripens with Hale Haven or fourteen days before Elberta. Excellent canning variety.

Halehaven. A hardy, heavy bearer of perfect freestone, yellow-fleshed fruit. Tree is a strong, thrifty grower, resistant to common diseases; fruit is large, oval shaped, with

good tough skin, with beautiful red coloring. One of the finest peaches for "quick freezing."

Redglobe. Fruits large round with light pubescence. Skin is highly colored with red over a good yellow ground color. A freestone and complete absence of red in the flesh makes it an outstanding canning peach. Very good quality. Chilling requirements about same as Elberta. Blossoms are large and self-fertile. Widely tested and very promising. Very resistant to bacterial spot.

Loring. This variety is a dependable bearer and trees are particularly vigorous and strong. The fruit is an attractive red over a bright yellow under color. It sizes up well, is high in quality, firm, and very attractive. Blooms early, requires short rest period, and ripens about ten days ahead of Elberta. Very resistant to bacterial spot. Undoubtedly this will prove to be one of our most desirable varieties for commercial planting.

Sullivan Early Elberta. A bud sport of Elberta, ripening seven to twelve days earlier. Fruit is average large in size, is of fine quality, and shows good shipping ability. A great success wherever planted.

Blake. (N. J. 117.) Fruits are medium to large, very highly colored with attractive red over good yellow ground color. It is a freestone, having considerable red at the pit, and extending to the flesh in some cases. Flesh is very firm with excellent flavor. Trees are good growers, ranks with Elberta in hardiness of bud and tree. The size, its bright attractive red coloring and season of ripening should make the Blake a desirable peach to precede Elberta, which it does by about one week.

Belle of Georgia. Leading white variety for commercial plantings. Fruit large, with bright attractive red almost covering the white background. Flesh white, highly flavored and very firm. Very vigorous, hardy, and productive.

Redskin. Redskin is a cross between Hale and Elberta. It ripens slightly ahead or with Elberta. Tree is vigorous, fast growing and productive. Fruit is round, yellow flesh, with little or no color near pit. It is a complete freestone, firm flesh of excellent shipping quality, well colored with a deep red blush covering the fruit even when ripening under shade conditions. In taste, it is aromatic, vinous and sweet. Due to the firmness, it is rated high for canning. Fruit a good size even with heavy load on trees.

Elberta. Still the most popular peach on the market, and universally planted. Yellow freestone of excellent quality; juicy, firm but tender. Tree is hardy, productive and disease resistant. Not the best in quality, but its size, color and firmness combine to give it first place in both commercial and home orchard plantings.

Jefferson. (Formerly listed as V.P.I. 48.) Fruit is noted for bright skin color, size, firmness of flesh, texture and flavor, in addition to being fully freestone. This variety ripens about three days after Elberta. Blossoms are self fruitful and produce heavy set of fruit buds. Trees are vigorous growers. Please note that Jefferson will not be available until Fall, 1962.

Shipper's Late Red. Splendid peach to follow Elberta. A large, very highly colored, attractive red, yellow-fleshed freestone. Good quality. A good shipping peach, extremely productive. Very hardy and its beauty and size enables it to bring top prices on the markets.

Rio-Oso-Gem. Generally recognized as one of the better peach ripening after Elberta. Widely grown and a beautiful peach. Fruit large in size with brilliant red color and light pubescence. The flesh is firm and fine textured with excellent flavor. Because of its firmness of flesh, it is excellent for freezing, canning, and other uses. Rio-Oso-Gem is an outstanding commercial variety.

Old Fashioned Indian Red. Very highly colored, red as blood to the seed. Very desirable for pickling.

CHERRY TREES

Healthy, Heavy-Bearing Trees—Easy to Grow

Large Montmorency. The universal canning and pie Cherry. Considered the finest sour Cherry in cultivation. Young trees produce tremendous crops of large, firm fruit.

Early Richmond. The leading early sour Cherry. Trees vigorous everywhere planted. Fruits dark red; flesh pale yellow, tender and melting.

Prices of Pie Cherries

	1 to 9 each	10 to 49 each	50 to 99 each
4 to 6 ft.—11/16"	2.40	1.85	1.25

Hansen Bush Cherry. A delightful ornamental shrub, producing delicious large, sweet, black Cherries. Very productive and hardy. Dwarf growing; 4 to 6 feet tall at maturity. Plant two or more for best results. **3 yr. bearing size, $1.25 each; 3 or more @ $1.10 each.**

PEAR TREES

Delicious Fresh from the Tree or Canned

Large, Vigorous Trees Bearing Enormous Crops

New Orient. One of the very few almost entirely immune to blight. Its fruit is excellent fresh or canned; melting, juicy, mild subacid flavor. Fruit round, yellowish with red blush. Interplant with Kieffer for pollination purposes. Late August.

Bartlett. Grown profitably in every Pear-growing section of America. Trees vigorous, bearing when young. Fruits large and long, with clear yellow color when mature. Flesh fine grained and juicy. September 1 to 10.

Ayres. Obtained by crossing Garber with Anjou. Fruit golden russet with rose blush; very attractive. Trees are good growers, spreading in habit, and blight resistant. Fruit ripens in mid-August. Flesh is white, tinged with yellow, melting and juicy; flavor sweet, sub-acid and very good.

Carrick. This is a rusty red pear of good dessert quality. Variety is a progeny of Seckel crossed with Garber. Fruit must be mellow to develop its best flavor. Medium to large in size. Blossoms open medium early and have fertile pollen.

Kieffer. This standard variety is widely known. Trees grow to large size. Fruit long and heavy; flesh coarse and not so sweet. Largely planted for canning and is excellent for preserving. Late September.

	1 to 9 each	10 to 49 each	50 to 99 each

SENSATIONAL 5-N-1 APPLE

A Whole Orchard on a Single Tree

Five different varieties of Apples budded onto one Apple stock; gives you a chain of ripening, from early to late. Plant this in a corner of your yard or garden, and delight your family and friends. **2 yr. 4 to 6 ft. size, $2.50 each; 3 or more, $2.25 each.**

DWARF APPLE TREES

Requires Little Space to Produce Big Delicious Fruits

Besides being a beautiful addition to the landscape, they develop crops of fruit each year. Never spread or grow taller than 12 to 15 feet, and make a colorful ornamental tree. Most varieties start fruiting the second or third year after planting. We offer four choice varieties: Dark Red Delicious, Yellow Delicious, Red McIntosh, and Dark Red Stayman. **2 yr. 3 to 4 ft. size, $3.25 each; 3 or more, $3.00 each.**

FIGS

The Fruit of the Coast Country. Produces Abundant Crops over most of the Cotton Section. Tops will sometimes kill back, but if dead wood is pruned out, plant will make new growth and bear fruit first season.

Celeste. Popularly called "Sugar Fig." Medium size; purplish brown, sweet and good. Very prolific.

Everbearing. Fruit brownish yellow, shaded bronze; flesh white with pink center, sweet and delicious. One of the most desirable Figs grown. Bears when quite small and usually all season.

Specializing in Growing Quality Fruits and Plants
Selling Direct to the Planter

APRICOT, NECTARINE, PLUM AND PRUNE TREES

For a Taste Treat Eat These Delectable Fruits Fresh from Your Own Garden

Moorpark Apricot. An attractive variety of high quality and fine flavor. Fruit is large, deep yellow, with a red cheek. Grows to about the same size as a Peach tree. Mid-August.

Garden State Nectarine. New Fuzzless Peach. A beautiful big peach with smooth, golden yellow skin, almost completely covered with fiery red. Fruit is most delicious, with tangy flavor, golden yellow flesh and freedom from fuzz should make it popular in every Home and Commercial Orchard. Fine for eating fresh, Canning, Freezing, or Market. Trees are exceptionally hardy.

Redchief Nectarine. A recent V.P.I. introduction, which is proving to be one of the best white fleshed Nectarine. Fruits are good size, highly colored and freestone, with very pleasing flavor. Trees are thrifty and productive, with fruits showing marked resistance to brown-rot. Redchief should be considered in every planting of Nectarine. Ripens about ten days before Elberta. Fruits keep well in cold storage.

Stanley Prune. The sweetest and quickest to bear of any Prune yet grown. Often starts to bear the second year, and yields heavily every year. Fruit is covered with beautiful dark blue skin, over fine, sweet, juicy, golden flesh. Freestone, and a favorite for both canning and drying.

Blue Damson. Best-known Damson. Very vigorous, hardy and productive, often overladen with fruit. Skin blue-black; flesh golden yellow and rather tart. Partly freestone. Wonderful for preserving.

Methley Plum. A fine variety for any purpose. A recent introduction which is rapidly gaining popularity, due to its fine quality and handsome appearance. The fruit is medium to large in size, reddish purple in color with red flesh. It is juicy, sweet and of distinctive flavor. The tree is vigorous and upright in growth habit. Does well on most types of soil and is a heavy annual bearer.

Bruce Plum. Considered one of the best of the Oriental type plums. It ripens early (just after Mayflower peach), averages good size, very firm and fine quality for an early plum. If picked just as yellow background appears it will ship well and color a beautiful bright red with slight bloom over it in 3 or 4 days. Very productive but requires interplanting for pollination, using some other Oriental type plum.

Burbank Plum. Medium to large, orange-yellow, dotted and marbled red; flesh meaty yellow, sweet and good. Valuable for canning and a good market plum. Hardy and porlific.

CALIFORNIA TYPE GRAPES

Yes, you can grow them. They are Hardy. Varieties selected for flavor, size, and yield. They are delicious served fresh from vine and also for jellies, jams and juices.

Golden Muscat. New California-type Grape hardy where the old Muscats would not grow. Golden Yellow fruit with delicious, mild, sweet flavor. Firm and meaty flesh, with wonderful aroma. Large, waxy fruit. Heavy rooted 2-yr. vines, **$1.00 each; 3 for $2.60.**

New Seneca. Skinless, golden yellow, sugar-sweet. Firm, juicy meat and a deliciously sweet flavor, with skin that is edible. Perfectly hardy where other northern Grapes are grown. Heavy-rooted, 2-yr. vines, **$1.00 each; 3 for $2.60.**

STANDARD GRAPES

Invest in Vigorous Cumberland-grown Grape Vines. They need little except training, lots of sunshine and plenty of plant food.

Agawam. Vine hardy and most productive of all reds. Bunch and berry large, reddish brown; tender, vinous and of excellent flavor.

Concord. Most popular and most widely planted of all Grapes. Large bunches of medium-sized blue Grapes of excellent flavor.

Fredonia. A new, very early blue Grape with excellent flavor. Bunch and berry very large; very juicy and delicious. Vine vigorous and productive. Good shipper as well as popular home variety.

Lutie. Very sweet, attractive, red Grape. Large, compact bunches. Thin skin; tender flesh. So sweet that it preserves itself on the vine, the juice condensing to syrup. Mid-season.

Niagara. An old favorite. The best known of the white varieties. Serves as standard among the whites, as Concord does among the blues. Berries and bunches large. Does not crack easily and hangs on the vine well after ripening. Mid-season.

SOUTHERN MUSCADINE GRAPES

The Famous Grape of the South

Dulcet. Clusters, medium; fruit, medium; skin, medium; reddish purple; quality, excellent; very persistent; hangs on vines well after fruit is full ripe, ripens around September 16th. One of the best varieties for fresh eating. Recommended for home vineyards.

Hunt. Clusters, large; fruit, medium to large; skin, medium to thin; black; quality, excellent; ripens around September 10th. Hunt is the best all-purpose dark grape. It is excellent for wine, unfermented juice, jelly and jams and all other commercial purposes. Highly recommended for both home and commercial vineyards.

Higgins. Clusters, large; pink to reddish bronze; skin, thick, edible; fruit, very large; quality, good; production, very heavy; ripens, mid-season to late, around September 20th. The largest of all muscadines, a new variety developed by the Georgia Experiment Station, Experiment, Georgia. A valuable addition to any vineyard.

Scuppernong. Clusters, medium; bronze; fruit, medium to large; skin, medium to thin; quality, excellent; ripens around September 4th. The best known and most widely grown variety of Muscadine grape. It is sweet with a good flavor.

2-yr. Plants: 1 to 5, $1.25 each; 5 to 10, $1.00 each.

POLLINATING VARIETIES

Dearing. Perfect-flowered; bronze; clusters, medium; skin, thin; fruit, medium to small; Quality, Excellent; production, heavy; ripens mid-season, around September 15th; the best bronze perfect-flowered muscadine. Dearing is a new variety released by the United States Department of Agriculture, Horticultural Field Station, Meridian, Mississippi.

Magoon. Perfect-flowering; reddish-black; clusters, medium to large; fruit, medium to small; Quality, Excellent; production, heavy; ripens mid-season, around September 15th; the best black perfect-flowered muscadine. The newest variety to be released by the USDA Horticultural Field Station, Meridian, Mississippi. Magoon is recommended as the best perfect-flowered variety for planting in the extreme South or Coastal Plains area. It is equally as good in all sections.

2-yr. Pollinating Plants: 1 to 5, $2.00 each; 5 to 10, $1.75 each.

RASPBERRIES

For Home and Market

Your Raspberry Success depends on the Quality of plants you start with. Plant our well-developed Raspberry bushes that are noted for their splendid root system.

Morrison. The new giant black Raspberry, praised by growers everywhere. Extremely large, shiny jet-black berries of fine flavor and less seedy than others. Vines are very productive, free from disease and very long lived.

Cumberland. Produces large, jet-black fruit, firm and of excellent quality. Starts to ripen in mid-season, continuing for several weeks. Fruit is large, plump, sweet and juicy, with a true "black-cap" flavor all its own. An ideal shipper.

2.25	4.10	12.35	26.80	43.10	75.00

Sunrise. The earliest high-quality red Raspberry. Berries are firm textured, juicy and of delicious flavor. Disease resistant. Excellent for home use. Strong grower.

Latham. The leading red Raspberry. Free from insects and diseases and multiplies rapidly. Large, plump, juicy, free from seediness and full of delicious flavor. Very hardy. Fine shipping and freezing variety.

Indian Summer. Giant Red Everbearer. The best and earliest everbearing red Raspberry. Bears a full crop in June and an immense crop in the fall. Wonderful keeping qualities. Berries are glossy red, and of extra-large size.

EBONY KING BLACKBERRIES

Hardy—Vigorous—Dependable

Increase your profit! One acre of Blackberries will average 800 to 2000 quarts, and prices on this fruit are always high. Plant Blackberries along trenches and lot lines, and turn waste garden space into profit. Excellent for home and market.

We offer Ebony King, the New Blackberry. Upright—Large—Sweet—Hardy—Early Bearer. No blanks or sterile plants. Best Blackberry available. This is the Blackberry we have been hoping for as other varieties have been disappointing crops. Ebony King, being the best and most prolific, we are discontinuing all others.

Strong 2-yr. Plants—6 for $3.00; 12 for $5.50; 25 for $10.00; 50 for $19.00; 100 for $34.50

THORNLESS BOYSENBERRIES

Huge, Delicious Hybrid Fruit

Enormous size, excellent quality, thornless and prolific. Produced by cross breeding Raspberry, Blackberry and Loganberry. Delicious served fresh, frozen, canned or in jam. Excellent for freezing, retaining its natural flavor and sweetness. Sells for top prices on the market but a little soft for long shipment. Unique, rich flavor. Thornless, easy to pick. Color a pleasing purple.

Strong Plants: 6 for $2.05; 10 for $2.55; 25 for $4.65; 100 for $14.05; 250 for $30.40; 500 for $48.85; 1000 for $85.00.

BLUEBERRIES

Giant Cultivated Blueberries, the Aristocrats of the Bush Berry Family
Always Delicious Fresh or Frozen
Every Home Should Grow These Delicacies

In addition to bearing profitable crop, the Blueberry is an attractive shrub, that may be planted on the lawn. Enjoy delicious Blueberries fresh, frozen or canned. Blueberry pie is hard to beat. We offer three leading varieties.

Jersey. The bush is of vigorous habit and grows very large. The winter color of the young growth is a light red over a gold brown. The berries are the largest of any here listed, of a very light color and ripens the same time as Rubel.

Dixie. Bush vigorous, open, spreading, productive. Berry very large, fair blue color, firm, good dessert quality. Late mid-season.

Burlington. Originated as a cross between Rubel and Pioneer. The picking quality of the Burlington is superior to many due to complete separation of berry from stem. It ripens later than Jersey or Rubel and because of good keeping qualities may extend that season for 10 days. The fruit is above average dessert quality, being surpassed only by Stanley, according to most authorities. The bush is erect, vigorous and seems very healthy. The berries are a good blue color, medium to large and hold up in size to the end of the season. Recommended for trial in all sections.

STRAWBERRIES

A Delicious Fruit—Easily Grown
Plant Our Big Luscious Strawberries for Heavy Crop and Delightful Eating

Healthy plants that will bear bumper crops. Varieties selected for flavor, size and yield. All Strawberries sent postpaid or express prepaid. Arrival in good condition guaranteed or we replace.

Blakemore. The ideal early shipping berry. Healthy plant that yields big crops. Fruit firm, of good color, and fine for long-distance shipping. Excellent flavor. Fine for freezing. **Virus Free.**

Armore. Proving more and more a grower's favorite each year. Introduced by the Missouri Experimental Station this variety has proved more productive than 60 others in actual growing tests. Berries are of excellent color and rate high in flavor. Fruits over a long period and makes a good fruiting row. Firmness rates it a superior shipping variety. We would recommend it for trial throughout the Premier, Blakemore growing areas. **Virus Free.**

Tennessee Beauty. Heavy yields—large, beautiful, firm berries is fast making it a favorite in central areas from North Carolina north to central Ohio and Pennsylvania. Introduced by the Tenn. Experimental Station, now being grown over a very wide area. Tennessee Beauty is considered the main commercial berry in many sections, and we can certainly recommend it to anyone who wishes a profitable midseason to late berry of unusual beauty and shipping ability. It is a free plant maker, very productive of large bright red, firm, high quality berries which are excellent for fresh use, shipping, preserving or freezing. **Virus Free.**

Pocahontas. Fast becoming the growers' favorite throughout the East. Since its introduction Pocahontas has really come to the front in its field. Pocahontas has been widely acclaimed throughout the berry producing areas as the best of the new strawberry varieties. It brought highest prices wherever sold this past spring for any and all markets—fresh, frozen, or processed. The plants are vigorous and very productive. Berries ripen about a week later than Blakemore, are large in size, color a vivid red, are glossy with tough skin and firm as Blakemore. The flavor is tart and good. Ideal for freezing. **Virus Free.**

Dixieland. This is a result of the same cross that produced Pocahontas and produces fruit that is slightly firmer and darker red. This variety is less susceptible to leaf spot and leaf scorch and has excellent keeping qualities, making it a good potential commercial berry of midseason ripening. **Virus Free.**

Red Rich (Plant Patent 993). Here is the new everbearer you have read so much about. Honeysweet berries, rich red all the way through. The largest, reddest and sweetest everbearer you ever saw. Thrifty and hardy. Bears early in the season and continues until frost. Perfect for freezing.

PAPER-SHELL PECANS

The South's Best Tree Crop

Nut trees make good shade trees and yield wholesome, delicious food. The Pecan is probably the most profitable nut tree it is possible to plant. We are proud of our Pecan trees because they come from the original Curtis plantation, where the water-level produces an exceptionally good root system. Furthermore, they are perfectly hardy and may be planted with confidence. From numerous improved varieties we have selected the hardiest, which succeeds over a wide territory. Ideal for growing in the South, and also—being early, matures farther north than any other varieties.

Stuart Pecan—the Best all-purpose Pecan for all areas. We offer you trees with excellent root system which makes them easy to transplant. Once established, the Pecan is a strong growing, shapely tree, which is long-lived. Perfectly hardy in or near the Cotton Belt and may be planted with confidence.

BLIGHT-RESISTANT CHINESE CHESTNUT

A Good Lawn Tree That Produces Fine, Sweet Chestnuts

These new blight-resistant trees will bear nuts two years after planting. They are fast growing trees, ideal to take the place of the old-fashioned American Chestnut that we all remember from our childhood days, now extinct from blight. The fruit is fully as delicious as the native Chestnut, and slightly larger in size. Tree grows to 35 feet tall. Best crops are insured by planting two or more trees for pollination.

	1 to 9	10-30

3 to 4 ft. bearing size	$2.00	$1.75
4 to 6 ft. bearing size	2.50	2.25

HEDGE

Fence the Friendly Way with Beautiful Living Fences

A hedge is ornamental as well as it affords protection, costs less than metal, wood or stone fence, requires little attention and upkeep, last almost indefinitely. We especially recommend Evergreen Chinese Privet for home planting and landscape effect. Also known as Amur River South Privet. Improved, evergreen type. Just as hardy as California Privet and has added advantage of retaining its glossy green foliage throughout the average winter. Rapid, compact grower, making a dense hedge in a short time. May be kept sheared to almost any desired height from 1 to 8 feet. Suitable for surrounding the entire home grounds or as a line between yards.

Planting. For a dense, compact hedge, plant 6 inches apart in a single row, pruning back within 2 or 3 inches of the ground at time of planting. For a screen, plant 12 inches apart.

FLOWERING SHRUBS

Beautify Your Home at Low Cost
Our Shrubs Are Select, Specimen, Finished Plants

Flowering shrubs are ever useful in any garden. They serve as borders and hedges along boundary lines, as screens, in foundation planting and as specimens on the lawn. There are so many kinds—all beautiful in their season—that is is not necessary to duplicate your neighbors' plantings. In flower, foliage and fruit, shrubs are decorative a good part of the year.

Abelia grandiflora. One of the most useful and beautiful of all flowering shrubs. Dark, glossy, evergreen foliage. Grows 4 to 6 feet tall, making it ideal for foundation plantings, hedges and shrub borders. Plant is covered spring to fall with clusters of dainty pinkish white flowers. Select 18 to 24-in. size, **$1.50 each; 3 or more, $1.25 each.**

Almond, Double Pink-Flowering. Attractive dwarf shrub. Double pink flowers in masses in early spring. Select 18 to 24-in. size, **$0.85 each; 3 or more, $0.75 each.**

Althea, or Rose of Sharon. An old-time mid-summer-flowering shrub, worthy of a place in modern planting. Double Pink, Purple, Red, and White. Select 2 to 3-ft. size, **$0.75 each; 3 or more, $0.65.**

Barberry, Red-leaved. Foliage bronze-red, turning to fiery-red in autumn. Popular for hedging or foundation planting. Select 18 to 24-in. size, **$1.00 each; 3 or more, $0.85 each.**

Butterfly-Bush, Charming. A very lovely shrub which produces lavender-pink spikes in summer. One of the most desirable of all flowering shrubs. Select 2 to 3-ft. size, **$0.85 each; 3 or more, $0.75 each.**

Crape-Myrtle. Well-known southern shrub. Immense panicles of crinkled little flowers Showy all summer. We offer these in White, Pink, Purple, and Red. Choice 2 to 3-ft. size, **$1.25 each; 3 or more, $1.00 each.**

Forsythia, or Golden Bells. An early-blooming shrub producing deep yellow, bell-like flowers in spring, before leaves appear. Hardy and quite showy. Select 2 to 3-ft. size **$0.85 each; 3 or more, $0.75 each.**

Honeysuckle, Fragrant. Very fragrant, creamy flowers in early spring. Foliage remains nearly all winter. Very desirable, compact plant. Hardy. Select 2 to 3-ft. size, **$0.85 each; 3 or more $0.75 each.**

Honeysuckle, Zabeli. One of the most shapely shrubs, with the finest foliage of all the bush Honeysuckles. A marvelous accent or specimen shrub. Attractive blue-green leaves, profuse red flowers in spring, and long-lasting red berries in late summer and fall. Select 2 to 3-ft. size, **$1.25 each; 3 or more, $1.10 each.**

Hydrangea, P. G. Old-fashioned, favorite shrub. Flowers creamy white, tinged with pink in late summer. Hardy. Select 18 to 24-in. size, **$0.85 each; 3 or more, $0.75 each.**

Hydrangea, Blue. Massive flowers, lasting for weeks and very showy. For best results, plant in moist, acid soil, using peat moss or similar organic material. Strong 2-yr. plants, **$1.50 each; 3 or more, $1.40 each.**

French Lilacs. An old shrub, more in demand than ever, because of much improved varieties. You are sure to enjoy these beautiful French Hybrid Lilacs. They will last a lifetime, blooming the first year after planting and annually thereafter. We offer Double Purple, Red and White. Choice 18 to 24-in. size, **$1.50 each; 3 or more, $1.25 each.**

Mock-Orange, Sweet. A very fine shrub. Has large-petaled, double crested flowers in clusters. Hardy. Select 2 to 3-ft. size, **$0.85 each; 3 or more, $0.75 each.**

Flowering Quince. Large shrub with scarlet blooms in early spring, followed by fragrant, yellow, quince-like fruits that hang on all season. Select 18 to 24-in. size, **$1.00 each; 3 or more, $0.85 each.**

Snowberry. Bushy, handsome, dark green foliage, with profusion of waxy white berries in fall. A garden-club favorite. Quite showy. Hardy. Select 2 to 3-ft. size, **$0.85 each; 3 or more $0.75 each.**

Spirea, Anthony Waterer. Valuable dwarf, compact shrub. Excellent for foundation or border planting. Rosy crimson flowers borne in flat clusters at tips of branches during most of the season. Select 15 to 18-in. size, **$1.00 each; 3 or more, $0.85 each.**

Spirea Thunbergi. Graceful bush covered with small white flowers in very early spring. Tiny fern-like leaves, turning to orange in the fall. Select 2 to 3-ft. size, **$0.85 each; 3 or more, $0.75 each.**

Spirea Vanhouttei. Most popular of the Spireas. Grows rather tall, with graceful, drooping branches. Great profusion of white flowers in early spring. Select 2 to 3-ft. size, **$0.85 each; 3 or more, $0.75 each.**

Sweet Shrub (Calycanthus). Desirable old-fashioned shrub much in demand. Flowers chocolate colored, with spicy fragrance. Hardy. Select 2 to 3-ft. size, **$0.85 each; 3 or more, $0.75 each.**

Tamarisk, African. A strong-growing shrub with bright green, feathery foilage. Deep pink flowers in May. Hardy. Select 2 to 3-ft. size, **$0.85 each; 3 or more, $0.75 each.**

Weigela, Old-Fashioned. Drooping branches covered with an abundance of pink, bell-shaped flowers in spring. Grows to large size and is quite hardy. Select 2 to 3-ft. size, **$0.85 each; 3 or more, $0.75.**

Weigela, Red. Same as old-fashioned Weigela except that the flowers are deep carmine-red. An excellent shrub, very striking and showy. Hardy. Select 2 to 3-ft. size, **$1.25 each; 3 or more, $1.10 each.**

A $4.40 VALUE **You Save $1.05**

CARE AFTER TRANSPLANTING

PRUNING TREES AND SHRUBS. After trimming back and pruning the limbs of ornamental trees, when planting, they need only enough trimming to shape them properly. Low side limbs should not be removed to raise the head until after two seasons' growth, when they may be gradually removed until the head is at the desired height. Shrubs need heading-in of the limbs getting out of bounds and the cutting out of older wood occasionally to keep them in proper form. The general rule is to trim fall blooming shrubs, like Hydrangeas, in the spring and spring-blooming shrubs like Spireas, in the early summer directly after they have bloomed.

Grows from 3 to 5 feet a year, and will reach a height 25 to 30 feet. Moraine Locust is a clean, tidy tree, ideal to plant near the house for quick cool shade in the summer. A tall, spreading, vase-shaped tree when fully grown.

5 to 6 ft.	$6.00	$5.75

FLOWERING TREES

Trees of Unmatched Beauty! Stately and Handsome!

These delightful ornamental trees are extremely decorative when in bloom but are also attractive when clothed with summer foliage. They are outstanding landscape material.

Crab-Apple, Flowering. Among the loveliest of all flowering trees. Quantities of spring bloom, followed by an abundance of showy small apples in varying hues. Highly ornamental and valuable in any planting. Tree form. We offer following choice varieties at these prices: **Select 3 to 4 ft. size, $2.00; 4 to 6 ft. size, $2.50 each.**

Almey. We offer the sensational new fiery crimson Almey, considered the most beautiful of all Crabs.

Eleyi Flowering Crab. Flaming Beauty. Attractive reddish foliage in spring. Single pink flowers. Showing red apples during summer.

Floribunda Flowering Crab. Delicate pink buds, followed by rosy-white flowers. Small yellow fruit in summer and fall. Green leaves.

Hopa Flowering Crab. The tree of amazing beauty. Dazzling beauty from early spring till frost. Spring beauty of bronzy red foliage, then the whole tree bursts into bloom—the most magnificent, fragrant pink flowers. Showy red apple during summer. Delicious for sparkling jelly. Easy to grow; hardy.

Red Silver Flowering Crab. Fruit rich maroon red, foliage somewhat cut-leaved with silver and red color. A remarkable combination. Lovely crimson flowers.

Red Vein Flowering Crab. Wonderful new variety with remarkable large red flowers in April, followed by large purplish-red fruit and leaves. This is a large growing Russian Turkestan variety.

Dogwood, White-flowering. Lovely four-petaled white flowers in spring on horizontally branched tree with spreading open top. Red berries in the fall. **Select 2 to 3 ft. size, $1.50 each; 3 to 4 ft. size, $2.00 each; 4 to 5 ft. size, $2.50 each.**

Dogwood, Pink-flowering. A lovely flowering tree. Beautiful four-petaled pink flowers in early spring. Does best in moist soils. Very striking effect when combined with white variety. **Select 2 to 3 ft. size, $3.00 each; 3 to 4 ft. size, $4.00 each.**

Note:—Add $1.00 each per plant for B&B Dogwood, both White and Pink varieties. Above quotations are bare-root.

Flowering Peach Trees. All varieties offered below are very double flowers like little roses in spring. Suitable for specimen or large group planting. We offer very showy and prolific strains. Prices on all Flowering peach in select trees: **2 to 3 ft. size, $1.25 each; 3 to 4 ft. size, $1.50 each; 4 to 6 ft. size, $2.00 each.**

Peppermint Flowering Peach. This is really a beauty. Two-tone in every respect. Flowers marked with red stripes.

Red Flowering Peach. The old favorite in Flowering peaches. It produces beautiful double red flowers.

White Flowering Peach. Another very fine flowering Peach, with its double white flowers.

Red-leaf Peach. The new sensational three-purpose tree. Ornamental blood-red foliage

and a profusion of deep rose blooms, followed by edible red fruit which is excellent for pickles. You'll be delighted with this novelty.

Prunus Pissardi, or Purple-leaf Plum. Small tree with compact leaves of rich dark purple and maroon. Stays red throughout season. Very lovely with contrasting delicate white blooms in early spring. Colorful and showy in any planting. **Select 2 to 3 ft. size $1.25 each; 3 to 4 ft. size, $1.50 each.**

Tulip-Tree. A tall, pyramidal tree of stately beauty. Large, glossy leaves, huge, tulip shaped flowers in early spring. **Select 5 to 6 ft. size, $2.00 each; 6 to 8 ft. size, $2.50 each.**

Redbud, Eastern. Beautiful, well-known, ornamental tree, having double, reddish purple flowers in spring before leaves appear. Very striking and a general favorite. Hardy. **Select 4 to 5 ft. size, $1.50 each; 5 to 6 ft. size, $2.00 each; 6 to 8 ft. size, $2.50 each.**

Mimosa, or Silk-Tree. Attractive, lacy foliage on a low spreading tree. Large heads of pink, sweet-smelling flowers in May. Very graceful and lovely. Rapid grower. **Select 5 to 6 ft. size, $2.25 each; 6 to 8 ft. size, $2.50 each.**

Linden, American. A large, formal tree. Leaves dark green, yellow in fall. For street and specimen planting. **Select 5 to 6 ft. size, $2.50 each; 6 to 8 ft. size, $3.75 each.**

Magnolia Soulangeana. Large lily-like, fragrant flowers in dark purplish red; early. Very hardy. Grows to 12 to 15 feet. **Select 2 to 3 ft. size, mossed, $3.50 each; 3 to 4 ft. size, $4.50 each.**

BUY QUALITY NURSERY STOCK DIRECT FROM THE GROWER

Attention County Agents and Vocational Teachers!

We cater Especially to Extension Service Workers and Vocational Teachers. Send us your cooperative orders. We are glad to pack out to individual order. We have scaled our prices to give you benefit of quantity rates, where these are earned, rather than offering Club discounts. All prices are net, f.o.b. McMinnville, Tenn.

Shipping Season. We begin filling orders in the fall as soon as our nursery stock is properly matured or ripened for transplanting, usually about November 1st, and continue digging and shipping during the entire fall and spring months. The planting season in the spring is usually over by May 1st, depending upon weather conditions and type of stock involved.

Order Early. We earnestly request our patrons to send their orders in early and specify when you wish them shipped. We pride ourselves on making prompt delivery but sometimes in our rush season we cannot get the orders shipped on the exact time, and must ask our customer's indulgence for a week or so and shipment will be made as promptly as possible. If time of shipment is left to us we can assure our customer of receiving stock in perfect condition and in proper planting season.

Guarantee. We accept all orders subject to crop conditions, and we reserve the right to cancel a portion of the stock, or all thereof, should injury befall our stock from hail, windstorm, frost, other weather conditions, error in count, insect and disease injury, or other natural causes beyond our control. We are careful to keep our varieties true to name and will replace any portion of the stock that may prove otherwise or refund the price paid for such portions. It is agreed that the original price shall be the maximum damages the purchaser is entitled to. Further, we guarantee to dig, pack and ship good, clean, thrifty, well grown trees and plants, in good growing condition. Failure may result from improper planting, lack of moisture, frosts, floods, overfertilization, etc., and we cannot guarantee continued growth after stock is planted on customer's premises because this is entirely beyond our control. Claims, if any, for damages or inferior stock, must be made within five days after arrival.

Receiving Stock in Cold Weather. In event it should turn cold after your stock has been shipped to you and there is a possibility that there is frost in the box in which the stock is shipped, put the box in a place where the temperature is above freezing—a cellar or a frost-proof building, and do not disturb for 5 to 7 days, at which time stock can be removed from the box in first-class condition. Under no circumstances should you open a box when you think there is frost in it, it will kill it. But if allowed to thaw out in the box, the stock will not be injured. Be sure and follow this practice.

Terms. Our terms are net cash with order. Remittance may be made by Postal Money Order, Postal Note, Express Money Order, or personal check. Tennessee shipments require 3% Sales Tax.

Add 20% for postage and handling charges on Parcel Post orders.
Express orders shipped collect.

Prices in this catalog are effective for the 1960-1961 season, or until supplemented by a new issue of our catalog.

PLEASE NOTE—Any Sales Tax which may be imposed on nursery stock by State or Federal authority should be added to the amount of your order. You will be advised of any changes or additions which may be made when orders are acknowledged.

Average Bearing Age and Planting Distances of Fruits and Nuts

FRUITS

Variety	*Age of Bearing*	*Planting Distance*	*No. Acre*
Apple, Standard	2 to 8 yrs.	35x35 ft.	35
Apple, Dwarf	2 to 3 yrs.	15x15 ft.	193
Apricot	2 to 3 yrs.	10x20 ft.	108
Blackberries	1 yr.	3x 6 ft.	2,420
Blueberries	2 to 3 yrs.	4x 4 ft.	2,722
Boysenberries	1 yr.	6x 8 ft.	907
Cherry, Pie	2 to 3 yrs.	20x20 ft.	108
Cherry, Sweet	4 to 5 yrs.	20x20 ft.	108
Figs	1 to 2 yrs.	15x15 ft.	193
Grapes	2 yrs.	6x 8 ft.	907
Nectarines	2 to 3 yrs.	20x20 ft.	108
Peach	2 to 3 yrs.	20x20 ft.	108
Pear	2 to 3 yrs.	20x20 ft.	108
Plum	2 to 3 yrs.	20x20 ft.	108
Quince	2 to 5 yrs.	15x15 ft.	193
Raspberries	1 yr.	3x 6 ft.	2,420
Strawberries	1 yr.	1x3½ ft.	9,900

NUTS

Chinese Chestnut	2 to 5 yrs.	30x30 ft.	48
Filberts	2 to 5 yrs.	15x15 ft.	193
Pecans	4 to 8 yrs.	40x40 ft.	28

Time required for trees and plants to begin fruiting after being transplanted may vary considerably, depending somewhat on the age and size of plant at time of transplanting, as well as the nature of the soil, care given, the season, and many other conditions. Even some varieties of a class will begin fruiting earlier than others. So the above table gives only approximate bearing ages under normal conditions.

Number of Trees or Plants to the Acre (Square System)

RULE—Multiply the distance in feet between the row by the distance the plants are: number of square feet for each plant, which, divided into the number of square feet in the acre (43,560), will give the number of plants or trees to the acre.

There is nothing finer grown than

CUMBERLAND FRUIT TREES

for abundant year-in and year-out fruit yields

YOU WIN!

When You Order By Mail

Here Are 5 of the Reasons

1. It is much easier to order by mail at home.

2. You buy direct from expert nurserymen producing quality nursery stock.

3. You can decide intelligently at home—the planting location.

4. True descriptions give correct character of plants. An aid for properly placing plants.

5. Better methods of packing assure safe delivery at your door in excellent growing condition.
